

# FDX 1001 AM

Product code: 265403701

## Evaporable stamping and forming oil

This product is a low viscosity evaporating oil specially formulated for stamping and forming applications. It contains polar compounds to achieve most effective operations. It evaporates leaving very small amounts of residues, therefore degreasing of parts is not necessary.

### Applications

Suitable for drawing, stamping and cutting of electrical and automotive components.

The product may be applied pure with brush, cloth or similar.

### Benefits & Advantages

- Easy to apply
- Less defects in parts
- Less wear and tool failure
- Minimum wear in tools
- High film strength
- Better piece finishing
- Low odour
- Friendly for workers (low odour resulting in no headaches)

### Typical Performance Data

Typical	Value
Appearance	Colourless liquid
Density @ 20 °C, gr/cm <sup>3</sup>	0.76
Viscosity @ 20 °C, cSt	1.5-1.9
Flash point, °C	62
Pour point, °C	-40

All performance data on this Technical Data Sheet are indicative only and can vary during production.
