

FOODMAX GREASE ALU M 00

Product code: 263700201

Food grease based on aluminium complex thickener and white mineral oil

Foodmax Grease ALU M 00 is an aluminium complex grease designed for the lubrication of almost any application which requires a food grade lubricant. This product is formulated with complex soap, white medicinal oil, a firm additive package and authorized solid lubricants. They provide excellent lubricating properties and a high-water resistance, perfect when a combination of water presence and high loads is faced. This product can be used for bearings operated within a temperature range of -20 to 150 °C and thanks to their superior resistance to water they are very well suitable for the lubrication of chains or conveyor chains operated in very wet conditions. This combination is often seen in packing operations and slaughterhouses. Foodmax Grease ALU M-00 is suitable for central lubricating systems requiring an NLGI 00

Applications

- General lubrication and bearings in the food industry
- Slide ways and chains
- Water valves and tap lubrication
- Central lubrication
- Gearboxes

Benefits & Advantages

- Food grade greases
- High resistance to water and loads
- Suitable for medium loaded high-speed bearings ($VF=5 \times 10^5$)
- Adhesive
- White coloured
- Contains solid lubrication
- Solves leaking issues with gearboxes running on gearoils

Performance level

- ISO 6743/9 L-XBCHB00
- DIN 51825 KP00K-20
